

FISH AND WILDLIFE DATA ORDER FORM

Agency/Organization: _____

Contact Person: _____

Address: _____

Phone #: _____

Date of Request: _____

Identify yourself (or the party you represent if you are a consultant) as one of the following:

- ☐ owner of land covered by this request ☐ government agency ☐ tribe ☐ researcher with a university
☐ other (please specify) _____

REQUESTER READ AND SIGN

By receiving fish and wildlife information from the Washington Department of Fish and Wildlife (WDFW), you incur an obligation to use it in a way that does not cause undue harm to our public fish and wildlife resources.

All fish and wildlife species are vulnerable to harm from human activities. Harm can occur directly (e.g., an animal is harassed or injured) or indirectly (e.g., a nest tree is felled or a wetland is drained). Harm can occur unintentionally, even by those who value the fish and wildlife resources (e.g., repeated visits to a heron rookery which flushes birds from the nest and exposes eggs to cold weather and predators). The most serious threats to fish and wildlife, rather than being direct and malicious acts, are indirect human actions where harm to fish and wildlife was unintentional.

The Washington State constitution confers fish and wildlife ownership to all citizens of the state. WDFW is mandated to safeguard this ownership by preserving, protecting and perpetuating fish and wildlife resources. The public has a crucial role in fulfilling this mandate, for two reasons. First, the statewide distribution of fish and wildlife species and habitat is beyond the monitoring capability of any single agency. Second, the state's constitution gives to the people ownership of fish and wildlife but not of the habitat on which fish and wildlife's survival ultimately depends. Property owners are also habitat owners and their collective actions have a profound effect on the state's fish and wildlife.

The WDFW data gives you information on the location of many of Washington's most sensitive and vulnerable fish and wildlife resources. Use of this information must be commensurate with the vulnerability of fish and wildlife resources.

Fish and wildlife species are protected through specific legislation. Regulations most applicable to users of WDFW information include RCW 77.16.120 (taking of protected fish and wildlife), WAC 232-12-292 (Bald Eagle protection rules) and WAC 232-12-064 (live fish and wildlife).

I have read and understand the information above.

I understand that the species and habitats covered by this information are especially sensitive to human disturbance.

I understand human disturbance may be direct or indirect and may occur intentionally or unintentionally.

I understand that I have an obligation to use this information in a way that does not cause undue harm to the fish and wildlife resource.*

FISH AND WILDLIFE DATA ORDER FORM

Geographic coverage of request [Specify in one of the following formats: legal description (township, range, and section), US Geological Survey (USGS) 7.5-minute quadrangle map name, USGS 1:100,000 scale quadrangle map name, county name, hydrologic basin. List here or attach listing.]

PRODUCT FORMAT

Indicate desired products by checking appropriate blank box:

STANDARD MAP PRODUCTS

1. Detailed 1:24,000 11"x 17" Fish and Wildlife Vicinity Map (nine square mile)	<input type="checkbox"/>
2. Detailed 1:24,000 Scale Fish and Wildlife Map (available in: USGS 7.5-minute quadrangle or township overlay)	<input type="checkbox"/>
3. ♦Single Priority Species Distribution 1:100,000 Scale Map	<input type="checkbox"/>
♦Single Priority Habitat Distribution 1:100,000 Scale Map	<input type="checkbox"/>
4. Fish and Wildlife Summary Map by County	<input type="checkbox"/>
5. Anadromous Fish Map (all species combined)	<input type="checkbox"/>
Resident Fish Map (all species combined)	<input type="checkbox"/>
Priority Fish Species Map (all species combined).....	<input type="checkbox"/>
♦Anadromous or Resident Fish Single Species Map.....	<input type="checkbox"/>
6. ★1:24,000 Scale Old Growth (1988/1989) Map (USGS 7.5-minute quadrangle overlay)	<input type="checkbox"/>

DIGITAL DATA PRODUCTS (Arc/Info Export Format)

7. Priority Habitats and Species (PHS) Database and Wildlife Heritage (HRTG) Database	<input type="checkbox"/>
8. Washington Rivers Information System (WARIS) Database	<input type="checkbox"/>
9. ★Old Growth Database (1988/1989)	<input type="checkbox"/>
10. National Wetlands Inventory (NWI) Database	<input type="checkbox"/>

NOTE: For statewide requests data are only available in digital formats.

♦Please specify desired single species or single habitat type in the **Special Requests** section on the first page of this form (only displays one species per map or one habitat type per map).

★Covers most of Western Washington (excluding coastal lowlands).

MEDIA OPTIONS (check relevant options)

STANDARD MAPS

- ☐ Paper
- ☐ Mylar

DIGITAL DATA

- ☐ 9 Track Tape (1600 BPI)
- ☐ 9 Track Tape (6250 BPI)
- ☐ 5.25 inch Floppy (only for low data volume requests)
- ☐ 3.5 inch Disk (only for low data volume requests)
- ☐ Helical Scan 8mm Cartridge

DOCUMENTS

- ☐ Priority Habitats and Species Management Recommendations
- ☐ Priority Habitats and Species List

INSTRUCTIONS

Mail completed form to: Washington Department of Fish and Wildlife, Priority Habitats and Species, 600 Capitol Way N., Olympia WA 98501-1091.

You will receive an invoice itemizing the costs for your data and instructions for submitting payment.
